We all have a basic game plan, based on which we spend our daily lives.

Have you ever thought about whether this plan is what you need to be truly happy?

We have to deal with many roles, which we have to execute nearly flawlessly. Work, relationships, family, free time exist in our minds like parallel universes that never meet each other.

At the center of all these interactions, however, is **always our self**. That's why personal development is a basic factor of how complete we feel.

Our self is the source from which we draw energy for everything else. Unfortunately, if that source isn't adequately fueled, it's not infinite.

Why is life coaching so popular nowadays?

Coaching is a \$ 20 billion Dollar a year industry.

Our relationships with ourselves and with those around us get inevitably entangled, making even the simplest decisions look hard. At that point, a coach's interference **brings us back to the center of our values and helps us redefine our goals.**

At **Global Academy of Coaching**, we follow **the most complete and internationally recognized curriculum**, certified as **Level 1 for 124 hours** or **Level 2 for 175 hours** and structured based on the standards and the Code of Ethics of the International Coaching Federation.

Why is life coaching the number one method of achieving your dreams?

Life Coaching draws its basic method straight from the Socratic method. With **enhanced self-discovery with insightful questions**. We never disclose our own opinions, even if we are tempted to give advice. The client always has the upper hand and is at the center of each session. We don't control their emotions or thoughts. Quite the opposite.

Our goal is to bring them to the surface so that the client can lead themselves to their own truth as well as to the reasons why they didn't want to face it for so long.

At **Global Academy of Coaching**, from the **8th month of your studies, you can create your own Coaching business**, choose your clients, and delve into Relationship Coaching or towards Executive Coaching & Mentoring.

What does "study life coaching" mean?

Life coaching is targeted towards those who believe in human value and have the insight to see others' true power and potential. Even though life coaching begins with a natural aptitude, its efficiency is increased through the right studies, which delimit the coach's instincts and reveal the most efficient tools in order to appropriately and productively set up their sessions. Choosing the right course of study derives from its structure, the timeliness of the methods as well as its certification by a recognized international organization.

At Global Academy of Coaching, you acquire a Level 1 124 hours or a Level 2 175 hours certification, which is officially recognized by the International Coaching Federation (ICF), the Global Coaching Organization that contains 50.000 coaches-members in 150 countries.
